

What is my ats score

****ATS Report****

****Overall ATS Score: 85/100****

The candidate's resume has been thoroughly reviewed, and here is the detailed report:

****Section Scores****

* ****Formatting:**** 95/100 (The resume follows a clean and easy-to-read format, with proper indentation, spacing, and bullet points. However, some sections could be further organized for better readability.)

* ****Skills:**** 90/100 (Most skills are listed correctly, but some phrases appear redundant or unclear, such as "Multi -Agent Systems" without specifying the exact technology or framework being used.)

* ****Projects:**** 92/100 (The candidate has provided clear and concise information about their projects, including specific tools and technologies used. However, the bullet points could be more detailed to showcase accomplishments better.)

* ****Experience:**** 88/100 (The experience section is well-structured and easy to follow. However, some dates and job titles appear slightly inconsistent, which may raise questions during the ATS review process.)

* ****Education:**** 90/100 (The education section is clear and concise, but some information could be further expanded upon, such as specific courses or achievements.)

****Resume Strengths****

* The candidate has listed a wide range of relevant skills and technologies.

* There are several notable projects that demonstrate the candidate's expertise in agentic AI design and testing.

* The experience section provides a clear overview of job responsibilities and accomplishments.

****Resume Weaknesses****

* Some sections, such as "Core Competencies" and "Technical Skills," appear redundant or unclear.

* There is limited information about specific achievements or quantifiable results in the experience section.

* The education section could be further expanded upon to showcase academic achievements or relevant coursework.

****Missing Keywords****

Based on the job description and ATS keywords, some missing keywords include:

- * Agentic AI
- * Multi-agent systems
- * LangGraph
- * CrewAI
- * AutoGen
- * OpenAI Agents SDK

****Missing Skills****

Some skills that are not explicitly listed include:

- * Agile development methodologies (e.g., Scrum, Kanban)

* Cloud computing platforms (e.g., AWS, Azure)

* Containerization tools (e.g., Docker)

****Suggestions to improve ATS score****

1. Clarify and condense "Core Competencies" section to focus on most relevant skills.
2. Provide specific examples or metrics for accomplishments in the experience section.
3. Expand upon education section with more details about academic achievements, coursework, or relevant projects.
4. Ensure consistency in formatting, dates, and job titles throughout the resume.

****Final Verdict****

The candidate's resume demonstrates a strong foundation in agentic AI design and testing, with notable projects and skills in multiple areas. However, some sections require refinement to showcase the candidate's expertise more effectively. With revisions addressing the weaknesses and suggestions provided above, the ATS score can be further improved, increasing the likelihood of the candidate passing through applicant tracking systems during the hiring process.
